Personal Overview

I am a **UX-focused** Web-App Developer who loves creating user-friendly designs and applications that address problems in innovative ways. Despite my preference and knowledge of the web, I am always open to experiencing new ways of creating that interest me.

Often, when I think of what to create, I reflect on my own problems and interests for inspiration in my projects, as it gives me a true sense of what needs to be part of the solution and drives me to keep iterating until I reach a state I can be happy with. My education and experience have provided me with multiple opportunities to work with groups of people across different environments and time frames, allowing me to gain meaningful insight into how a workforce operates.

Skills

Technical: HTML&CSS, JavaScript, TypeScript, React, Git, Figma, Python, Flask, PostgreSQL/SQLite

Soft Skills: Resourcefulness, Organisation, Punctuality, Perseverance, Attention to detail

Education & Experience

HackEd 2026

February 23-25 2026

- Developed a Winning Application “Uni Wallet” with a pitch/presentation within a 3-day time limit
- Collaborated in a small team comprised of many different roles
- Worked as a **UI/UX designer, web developer, and unit tester**
- Communicated the purpose and benefits of our product to external parties

Tech Educators

May 2025 - July 2025

- Completed their 12-week **Software Development boot-camp**
- Worked on two group projects, building vanilla JavaScript and NextJS web apps with an **agile framework**
- Further developed my web development skills by learning new frameworks and libraries, including **Express, Vite, Tailwind, and Next.js**, while embellishing my skills in vanilla JavaScript and React.
- Learned industry-standard methods of improving code organisation.

Access Creative College

September 2023 - July 2025

- Achieved a grade of **Distinction** in their **Software Development T-Level**
- Developed skills in Python libraries such as Pandas and Matplotlib, creating multiple projects using one or both in tandem.
- Gave numerous presentations on research topics and my work.
- Learnt fundamentals of UI/UX design, full-stack web development, and React.

Long Stratton High School

September 2018 - July 2023

- Learnt fundamentals in network concepts, computer hardware, and learnt Python 3 for functional programming architecture & design, debugging and error handling, and file read/write syntax.
- Gained experience designing and creating projects in CAD software (Solidworks).
- I learned to communicate my thoughts and justifications in writing across multiple subjects.
- Created innovative designs, focusing on user understanding and each item's purpose.

Final Grades

Maths	–	9
English Language	–	5
English Literature	–	6
Computer Science	–	9
Combined Science: Trilogy	–	9–9
Design and Technology	–	7
Geography	–	7
Drama	–	5
